

Video Game Insight

1. Top-Rated and Most Popular Games

- The highest-rated games (average rating > 4.5) tend to belong to Action, Role-Playing, and Adventure genres.
 - These titles also have the most wishlists and plays, suggesting a strong overlap between critical acclaim and player interest.
 - Games with higher Number of Reviews often show more stable ratings, implying strong community engagement.
-

2. Developer Performance

- A few studios (e.g., Nintendo, Capcom, Rockstar Games) consistently achieve above-average ratings (≥ 4) and multiple successful releases.
 - The most productive studios (high count of titles) don't always have the highest ratings — indicating a trade-off between quantity and quality.
-

3. Genre and Engagement Patterns

- Action and Adventure dominate the dataset by count and engagement.
 - Simulation and Indie genres show high wishlist counts but lower sales — signaling niche but loyal audiences.
 - The average plays per genre show that RPGs and Strategy games have longer playtimes and replayability.
-

4. Release Trends

- Game releases peaked around 2015–2018, aligning with major platform launches (e.g., PS4, Switch).
 - Post-2020 data shows a gradual decline in new releases — possibly due to COVID-19 development slowdowns and shifts toward live-service models.
-

5. Global Sales Insights

- North America and Europe dominate global sales, accounting for ~70% combined.
 - Japan remains highly influential for handheld and niche titles.
 - Action and Sports genres generate the highest global revenue.
-

Overall Insights Summary

Area	Key Finding
Ratings	Average user rating: ~4.1, with top-rated games mostly in Action & RPG genres
Developers	Nintendo, Rockstar, and Capcom show consistent quality and output
Sales	Global sales led by Action and Sports; NA & EU dominate regional revenue
Platforms	PlayStation and Nintendo lead in both number of releases and sales
Genres	Action and Adventure most common; RPGs show highest engagement
Trends	Release peak 2015–2018, slight decline after 2020
